PART 01

Introduction

WHAT DEFINES US

Empowering Growth with Economic and Financial Insight

IEEF is an independent non-profit organization that serves as a think tank in the fields of economics, finance, and energy. We focus on delivering research, policy advocacy, and public education to ensure that economic and financial insights contribute directly to Indonesia's sustainable development and energy transition.

As a platform for collaboration, IEEF connects government, state-owned enterprises, private sector, academia, and society, turning knowledge into action. What defines us is our commitment to empower growth with economic and financial insight, building a future that is fair, inclusive, and sustainable.

IEEF connects

Government | State-owned enterprises | Private sector | Academia | Society

WHO WE ARE

Vision and Core Values

OUR VISION

To become a national and regional reference institution in research, policy, and financing for a sustainable and just energy transition.

CORE VALUES

1. Integrating energy, economic, and financial research into public policy.
2. Providing financing solutions for transition projects and policies.
3. Strengthening institutional capacity and governance in the energy transition.
4. Becoming a strategic partner for the government, state-owned enterprises, and international organizations.

What We Do

Economics & Finance Consulting

Research & Knowledge Publications

Capacity Building & Executive Training

Policy Design & Impact Assessment

Data-driven Economic & Financial Analysis

Policy Advocacy & Public Engagement

Area of Expertise

IEEF specializes in energy economics, finance, and public policy, with a strong focus on sustainability and innovation.

Our expertise covers renewable energy transition, electricity and gas markets, carbon pricing, and infrastructure finance, supported by rigorous research and data-driven analysis to deliver impactful and sustainable solutions.

- Energy Economics & Finance
- Electric Market Structure & Regulation
- Energy Policy and Governance
- Renewable Energy & Sustainable Transition
- Carbon Pricing & Environmental Economics
- Electric Vehicles & Emerging Technologies
- Consumer Behaviour & Technology Adoption
- Sustainable Finance & Green Investment
- Risk Management & Energy System
- Macroeconomics & Public Policy in Energy
- Climate Change & Energy Resilience
- Technology Innovation in Energy
- Energy Law & Regulation
- Capacity Building & Knowledge Transfer

Our Impact

Delivered policy recommendations to ministries & companies.

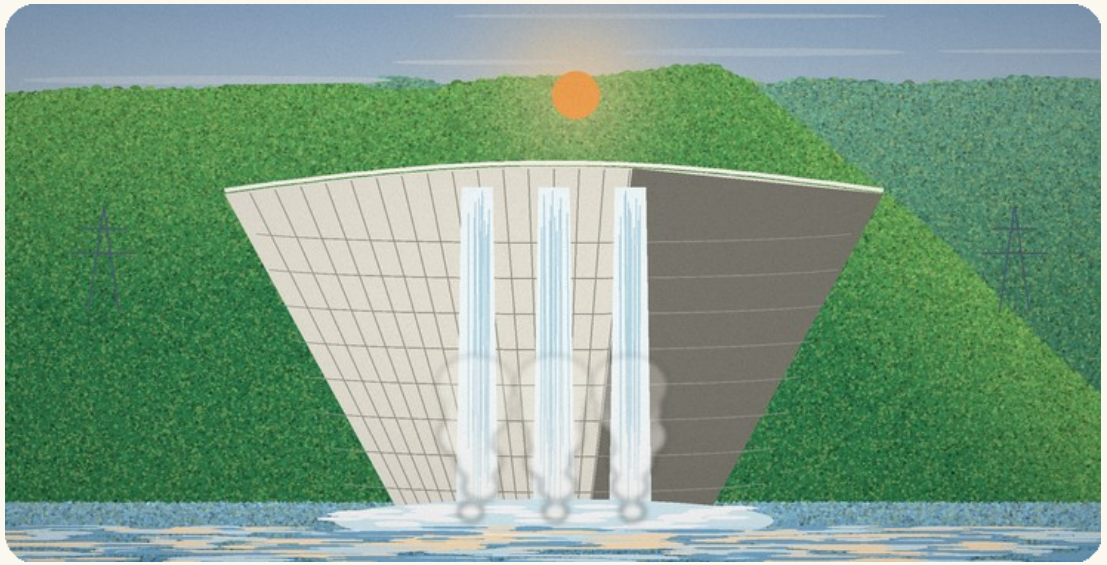

Published in top-tier journals and strategic reports.

Trained professionals nationally.

Advised on economy, energy and green finance.

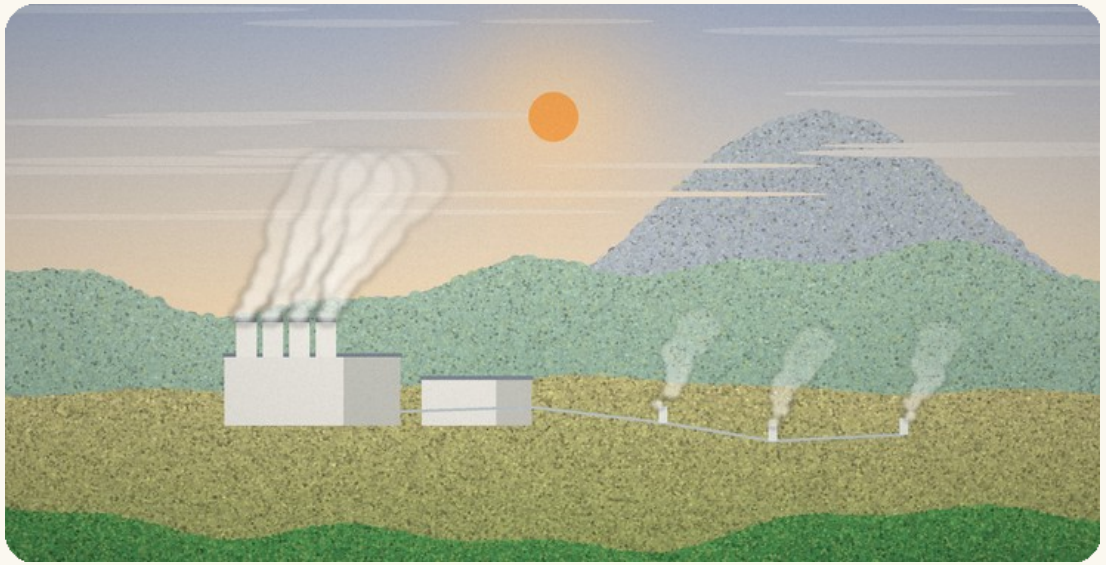

From shaping policy at the highest levels to building capacity across sectors, IEEF delivers outcomes that matter: measurable, strategic, and forward-looking.

Flagship Offerings

1 Economic Leadership Education (ELE)

Signature capacity building program for executives, professionals and institutional leaders.

2 Strategic Intelligence & Advisory (SIA)

Strategic reports and advisory for governments, SOEs, and corporations.

FLAGSHIP 01

Economic Leadership Education (ELE)

Signature Capacity Building Program

FLAGSHIP OFFERINGS

Economic Leadership Education (ELE)

ELE integrates advanced analytical tools and practical learning to strengthen leadership, policy, and decision-making in economics, energy, and finance. Designed for executives, professionals, and institutional leaders, the program bridges analytical rigor with applied practice to address real-world challenges across these critical sectors.

01

Economics: Microeconomic, Macroeconomic, and Market Analysis

Builds participants' understanding of micro and macro principles to analyze markets, interpret indicators, and support better strategic and financial decisions.

02

Finance: Financial Management, Investment Project Evaluation, and Stock Market

Equips participants with practical financial management and investment evaluation skills to make informed and effective financial decisions.

03

Strategy: Corporate Entrepreneurship, Innovation & Strategic Management

Develops innovative and entrepreneurial thinking to design and implement strategies that enhance organizational competitiveness and adaptability.

04

Business Leadership & People Management

Enhances leadership and people management skills to align business strategy with human capital, fostering effective teams and sustainable organizational performance.

05

Research: Research & Publication Writing

Strengthens research and academic writing skills to support publication, policy development, and institutional learning.

06

Data Analytics: Machine Learning & Artificial Intelligence (AI)

Introduces the use of machine learning and AI to transform data into actionable insights for smarter and faster decision-making.

07

Customized Module

Offers tailored learning experiences designed to meet each organization's unique goals, challenges, and development priorities.

Two signature programs

Economics for Non-Economists and Finance for Non-Financial Managers: 40 contact hours each.

FLAGSHIP OFFERINGS

Economics for Non-Economists

IEEF Institute for Energy, Economics, and Finance

SBMITB School of Business & Management

Builds economic reasoning capacity for professionals with no formal economics background through eight modules and 40 contact hours (JP), divided equally between microeconomic and macroeconomic analysis.

PART A · MICROECONOMICS — 20 JP

1 Economic Analysis Framework & Managerial Decision-Making — 4 JP

Constrained optimisation as a decision frame; opportunity cost vs. sunk cost; marginal analysis for capacity and activity choices.

2 Demand Theory, Consumer Behaviour & Elasticity — 5 JP

Demand determinants and curve shifts; price, income and cross elasticity; elasticity–revenue link for tariff and sales projection.

3 Production Theory, Cost Structure & Efficiency — 5 JP

Production functions and diminishing returns; fixed, variable, average and marginal cost; economies of scale; break-even and shutdown point.

4 Market Structure, Competitive Strategy & Government Intervention — 6 JP

Natural monopoly and the economic case for regulation; game theory; taxes, subsidies, tax incidence and deadweight loss.

PART B · MACROECONOMICS — 20 JP

5 Macroeconomic Indicators, Growth & the Business Cycle — 5 JP

National output, productivity, unemployment and inflation; locating the economy in the cycle and translating it into demand and cost implications.

6 Aggregate Demand – Aggregate Supply (AD–AS) Model — 4 JP

Building the AD and AS curves; short- and long-run equilibrium; tracing demand-side and supply-side shocks.

7 Fiscal Policy, the Financial Sector & Monetary Policy — 6 JP

Multiplier model, budget deficits, money creation, monetary transmission and IS–LM; interest rates and cost of capital.

8 International Economics, Exchange Rates & Trade — 5 JP

Balance of payments, exchange-rate drivers and intervention; comparative advantage; gains, costs and protection in trade.

Finance for Non-Financial Managers

Equips managers with no formal finance background to build, test and defend the financial case behind their proposals. Adapted from the MM5006 – Financial Management and Policy syllabus (MBA SBM ITB) into eight sequential modules and 40 contact hours (JP), each module building on the one before it.

PART A · FOUNDATION & VALUATION — 18 JP

1 Corporate Finance Function & the Financial Market Environment — 3 JP

Value maximisation and the four core financial decisions; financial markets, institutions and funding sources; governance and ethics.

2 Financial Statement Analysis & Financial Planning — 6 JP

The three core statements and how they connect; liquidity, activity, solvency and profitability ratios; trend analysis and financial projection.

3 Time Value of Money — 4 JP

Present and future value; annuities and perpetuities; compounding frequency and effective rates; amortisation; lease, buy or defer decisions.

4 Bond & Equity Valuation — 5 JP

Interest-rate structure and risk; bond valuation and yield to maturity as the basis for cost of debt; dividend-growth and multiple-based equity valuation.

PART B · INVESTMENT & FUNDING — 22 JP

5 Risk, Return & Cost of Capital — 6 JP

Expected return, standard deviation and diversification; systematic vs. unsystematic risk; CAPM, after-tax cost of debt and WACC.

6 Capital Budgeting & Investment Decisions — 6 JP

Relevant incremental cash flows; payback, NPV, IRR and profitability index; sensitivity and scenario analysis; capital rationing and ranking.

7 Capital Structure, Leverage & Payout Policy — 5 JP

Operating, financial and total leverage; optimal capital structure, tax shield and distress cost; payout versus retention for growth funding.

8 Working Capital Management & Short-Term Decisions — 5 JP

Net working capital and the liquidity–profitability trade-off; cash conversion cycle; receivables, inventory, payables and short-term funding.

FLAGSHIP OFFERINGS

Methodological Approach for Economic Leadership Education (ELE)

ELE employs a practice-oriented and analytical learning methodology designed to strengthen capabilities in economics, energy, and finance. The approach integrates expert-led instruction, applied tools, and real-case simulations to ensure measurable skills development and immediate relevance to institutional contexts.

Expert-Led Thematic Lectures

Sessions led by seasoned practitioners and academics provide deep insights into strategic, economic, energy, and financial leadership themes.

Case-Based Policy and Market Analysis

Participants analyze real-world cases from economic, energy, and financial sectors to explore decision-making frameworks, market dynamics, and regulatory implications.

Analytical Tools and Modeling Clinics

Hands-on practice using Input-Output Analysis, System Dynamics, and Real-Options equips participants with tools for economic impact assessment and investment evaluation.

Simulation and Scenario Exercises

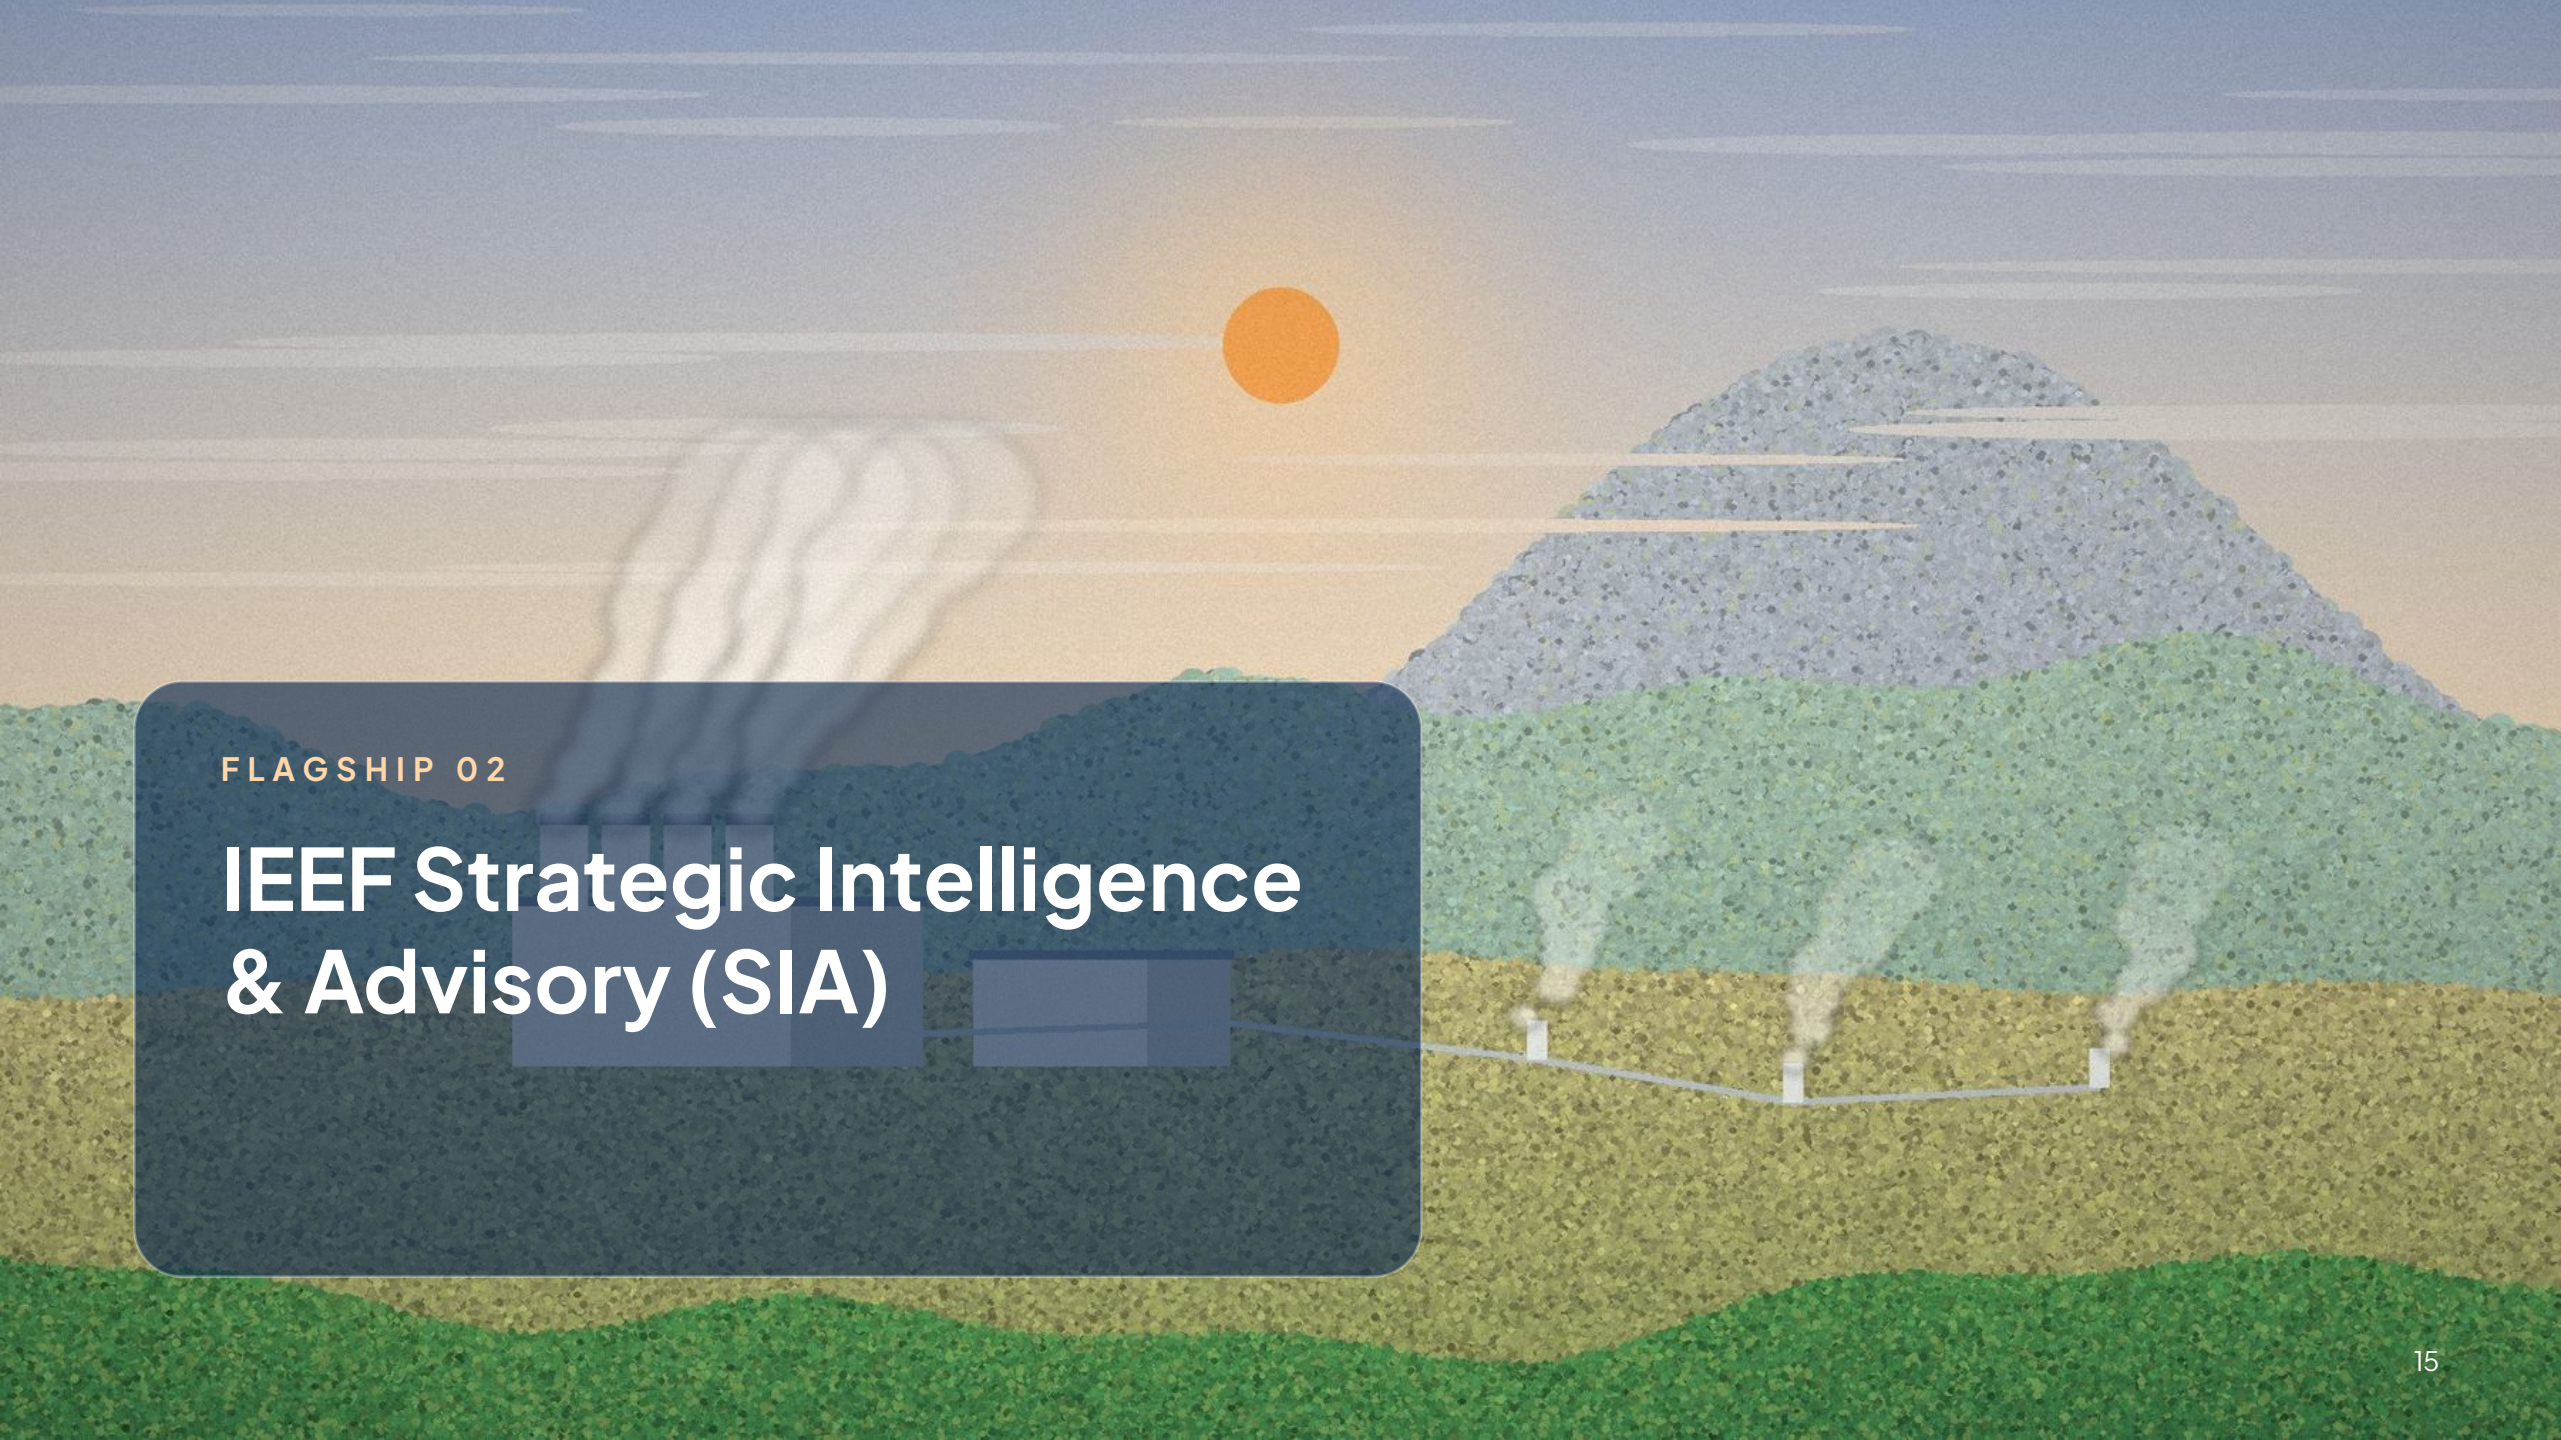

Interactive simulations (e.g., market scenarios, fiscal modeling, energy project analysis using RETScreen) enhance applied decision-making and strategic planning.

Collaborative Solution Workshops

Small group sessions focus on co-developing investment strategies, policy recommendations, or financial roadmaps aligned with sectoral challenges.

Action Mapping and Strategic Integration

Participants translate insights into actionable plans for their institutions, supported by guided templates and coaching to ensure real-world application.

FLAGSHIP 02

IEEF Strategic Intelligence & Advisory (SIA)

IEEF Strategic Intelligence & Advisory

This program provides governments, SOEs, and corporations in addressing energy transition, regulatory shifts, and economic transformation. With expertise in energy economics, finance, and risk modeling, IEEF delivers strategic reports and advisory services to support informed decisions and sustainable growth.

01

Regulatory and Market Landscape Review

Analyzes evolving policy, legal, and market dynamics relevant to energy, finance, and digital sectors to inform compliance and opportunity mapping.

02

Green Economy & ESG Strategy Alignment

Assists corporations in aligning operations with sustainability goals through tailored ESG frameworks, carbon pricing scenarios, and transition roadmaps.

03

Fiscal Risk and Incentive Analysis

Provides modeling of fiscal exposure, policy-driven incentives, and financial impact across different regulatory scenarios.

04

Economic Impact Assessment & Multiplier Analysis

Uses input-output modeling and macroeconomic tools to assess the wider impact of corporate investments or policy shifts.

05

Executive Briefs and Strategic Reports

Delivers high-level, decision-oriented documents to support corporate boards, government relations teams, and strategic units.

06

Energy Transition & Technology Pathways

Economic evaluation of renewable integration (solar, wind, hydro, hydrogen, geothermal), electric vehicles, storage, and digital energy systems, aligning technology adoption with national transition goals.

07

Strategic Foresight & Policy Advisory

Development of policy briefs, strategic foresight reports, and executive advisory documents that integrate energy economics, climate resilience, and national development priorities.

Methodological Approach for IEEF Strategic Intelligence & Advisory

IEEF adopts a multi-method research and advisory approach that balances analytical rigor with institutional relevance. Each engagement is tailored to the client's sectoral focus, policy landscape, and strategic needs, ensuring that insights are not only accurate, but also actionable.

1 Policy and Regulatory Scan

IEEF conducts structured reviews of relevant laws, regulations, and policy instruments to map risks, gaps, and institutional implications for the client.

2 Stakeholder Mapping and Institutional Diagnostics

Through interviews, document reviews, and ecosystem analysis, IEEF identifies key actors, power relations, and institutional bottlenecks affecting implementation or strategy alignment.

3 Quantitative Economic Analysis

IEEF employs tools such as input-output modeling, cost-benefit analysis, and scenario simulations to estimate fiscal impact, market potential, or macroeconomic effects.

4 Qualitative Field Insight and Expert Consultation

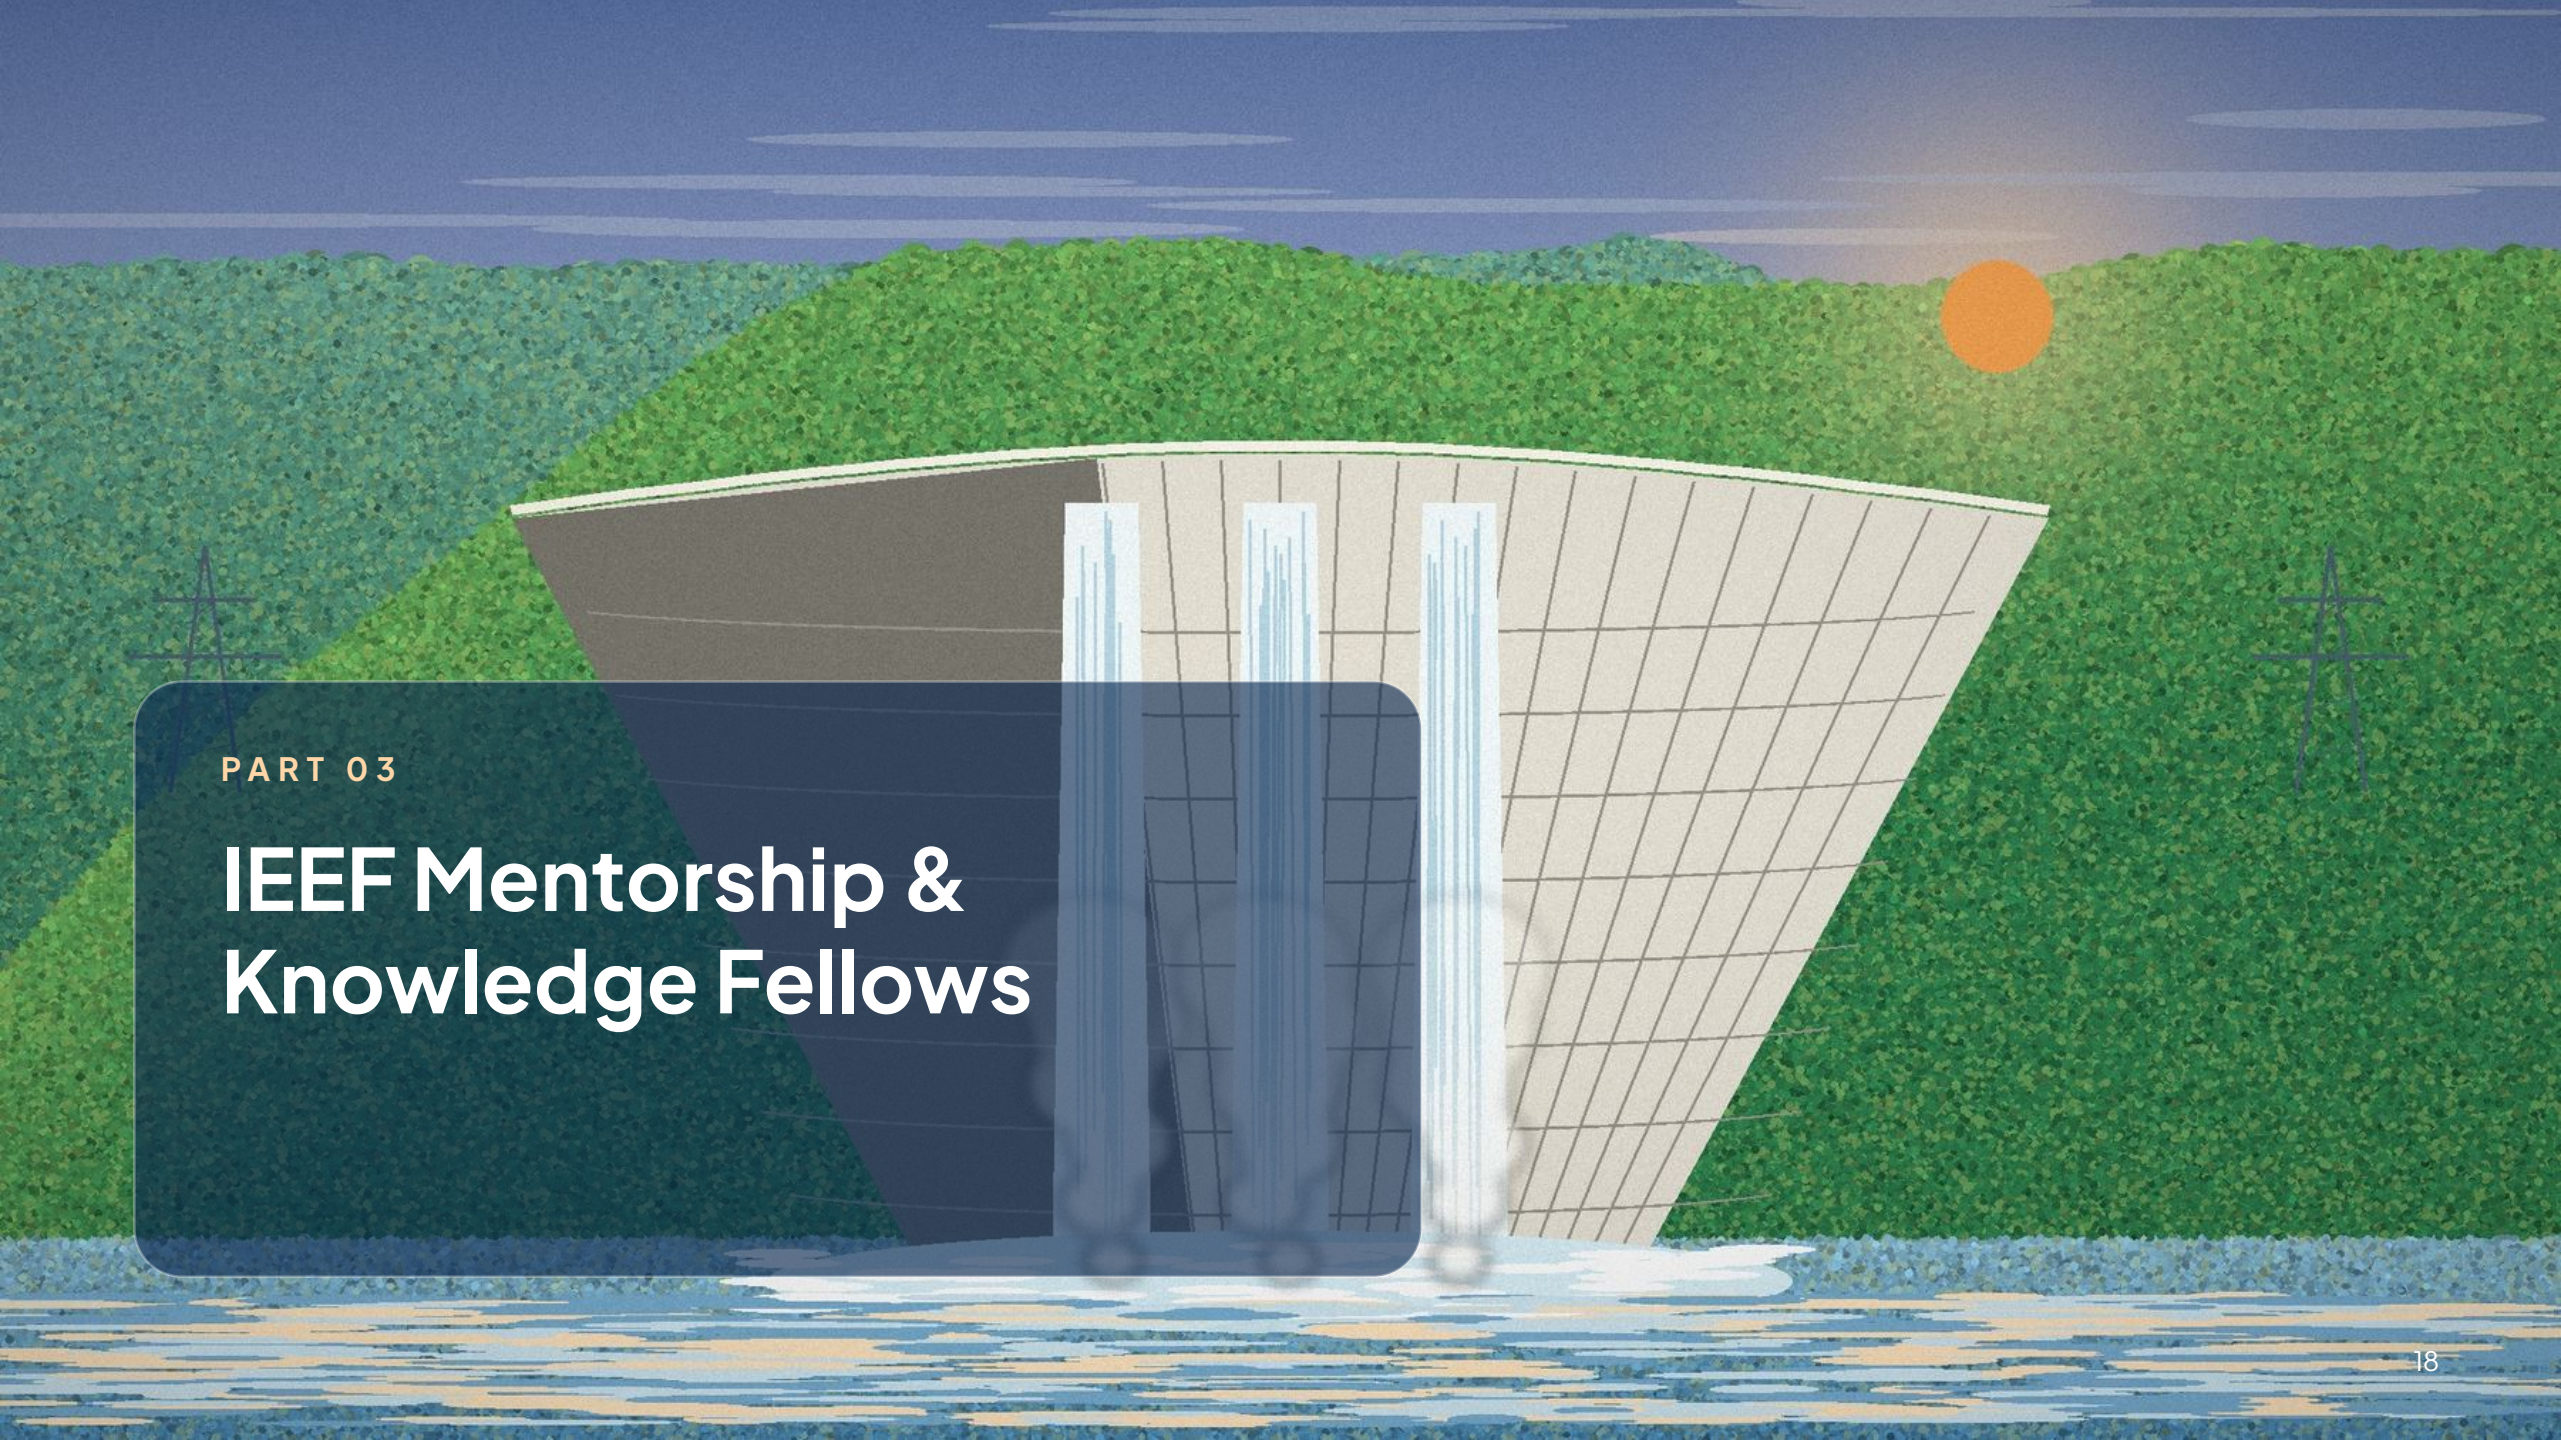

Where applicable, focus group discussions, key informant interviews, and expert panels are used to validate findings, capture contextual nuance, and enhance policy relevance.

5 Strategic Foresight and Scenario Planning

IEEF helps clients anticipate emerging trends, policy shifts, and external shocks using foresight tools and multi-scenario frameworks.

6 Executive Reporting and Policy Translation

Complex findings are synthesized into high-level briefing papers, policy memos, or board presentations to ensure clarity and decision-making utility.

PART 03

IEEF Mentorship & Knowledge Fellows

IEEF Mentorship & Knowledge Fellows

Ir. Dzikri Firmansyah Hakam, ST, PgDip, MSc, Ph.D, CFP®

Low Carbon Economics Finance

Prof. Dr. Yos Sunitiyoso, S.T., M.Eng., Ph.D.

Decision Sciences & Transportation Systems
